

SALENTO

INDICAZIONE GEOGRAFICA TIPICA

FIANO

I terreni calcarei-argillosi del Salento, il clima caldo e la brezza continua che spira dal mare, favoriscono l'aromaticità e la sapidità, tratti distintivi del nostro Fiano.

The sandy and clay soil from Salento, the intense light and fresh breeze that gently blows from the acilacent sea, contribute to the distinctive character of our Rano with its aromatic notes and a fresh crispy acidity.

 1.6 UK Units 9.8 UK Units per 750ml	PLEASE DRINK RESPONSIBLY The UK Chief Medical Officers recommend adults do not regularly drink more than 14 units per week drinkaware.co.uk for the facts about alcohol
